

Requested Patent: JP11185968A
Title: ORGANIC ELECTROLUMINESCENT DEVICE AND ITS MANUFACTURE ;
Abstracted Patent: JP11185968 ;
Publication Date: 1999-07-09 ;
Inventor(s): HAMADA YUJI ;
Applicant(s): SANYO ELECTRIC CO ;
Application Number: JP19970347656 19971217 ;
Priority Number(s): JP19970347656 19971217 ;
IPC Classification: C09K11/06; H05B33/22; H05B33/10; H05B33/14 ;
Equivalents: DE69805490T, EP0924965, B1, JP3540584B2, US6232713 ;

ABSTRACT:

PROBLEM TO BE SOLVED: To provide stable luminescence with each organic electroluminescent(EL) element so that a plurality of organic EL elements can be simply and properly separated when an organic layer is formed with a polymer material in an organic EL device arranged with a plurality of organic EL elements provided with the luminous organic layer between a hole injection electrode and an electron injection electrode. SOLUTION: In an organic EL device arranged with a plurality of organic EL elements 10 provided with a luminous organic layer 13 between a hole injection electrode 12 and an electron injection electrode 15, patterned electronic insulating barrier ribs 14 are provided on the organic layer 13, and the organic EL elements 10 are separated by the barrier ribs 14.
